

bare 20

Moisturizing UREA Gel

PRODUCT FACT SHEET

Packaging Size

4 fl oz. (118 mL)

NDC: 71718-001-01

DESCRIPTION

BARE 20 is a Urea topical gel. It's a professionally formulated ex-foliating gel designed to help soften and remove rough, scaly skin caused by warts, calluses, keratosis or psoriasis. It is a concentrated and highly effective anti-fungal foot gel that re-hydrates the skin to a healthy appearance; a softer, smoother and more ravishing skin surface. The fast absorbing gel provides grease-less, non-staining, non-irritating, soothing and moisturizing relief from redness, itching and scaling.

FEATURES

UREA: Urea is used to treat dry/rough skin conditions (e.g., eczema, psoriasis, corns, calluses). Urea is known as a keratolytic. It increases moisture in the skin by softening/dissolving the horny substance (keratin) holding the top layer of skin cells together. This effect helps the dead skin cells fall off and helps the skin keep more water in.

GEL: Bare Gel provides a greaseless, non-stainng, non-irrating, soothing, residue free and moisturizing relief from redness, itching and scaling.

PROTECT AND HYDRATE YOUR SKIN: Our Bare Urea products provides a fast absorbing, deeply moisturizing experience for your skin for complete hydration.

MSRP: \$29.99
