

bare 40 + SALICYLIC ACID Moisturizing UREA Gel

PRODUCT FACT SHEET

Packaging Size

4 fl oz (118 mL)

NDC: 71718-003-01

DESCRIPTION

BARE 40 Plus Salicylic Acid combines Salicylic Acid and Urea topical gel. It's a professionally formulated ex-foliating gel designed to help soften and remove rough, scaly skin caused by warts, calluses, keratosis or psoriasis. It is a concentrated and highly effective anti-fungal foot gel that re-hydrates the skin to a healthy appearance; a softer, smoother and more ravishing skin surface. Salicylic Acid ex-foliation is one of the best ex-foliating treatments available.

FEATURES

SALICYLIC ACID: Salicylic Acid is considered a keratolytic medication, which means that it's perfect for supreme ex-foliation. Keratolytic medications cause softening and sloughing of the top layer of skin cells. Salicylic Acid also loosens and breaks apart desmosomes (attachments between cells in the outer layer of skin). This allows deeper penetration of the Urea contained in Bare 40 Plus Salicylic Acid.

GEL: Bare Gel provides a greaseless, non-staining, non-irritating, soothing, residue free and moisturizing relief from redness, itching and scaling.

PROTECT AND HYDRATE YOUR SKIN: Our Bare Urea products provides a fast absorbing, deeply moisturizing experience for your skin for complete hydration.

MSRP: \$49.99

Active Ingredients

Urea 40%

Inactive Ingredients

Salicylic Acid 2%,
Aloe Vera, Green Tea
and Tea Tree Oil
